

*Serving immediate needs.
Supporting long-term solutions.*

Native American Partners,

As you may know, Partnership With Native Americans (PWNA) for over 25 years has developed and delivered a culturally relevant mix of services to help our Native American partners address critical needs that contribute to self-sufficiency and help end the cycle of poverty. Evolving from a small startup to a high-impact nonprofit with a clear mission, a dedicated team and committed donors who support our work, PWNA has established a steady, solid history of service with Native American communities.

Part of achieving our mission involves partnership and collaboration with various local businesses and agencies. We are proud to announce our new partnership with Sterns Produce in Arizona.

Sterns has a history of serving the Arizona community with fresh fruits, vegetables, dairy and other food items since 1917. A family-owned company, they share our passion and vision for improving food access for Native Americans, dietary health and a sustainable future.

Sterns has proven to be a reliable partner in terms of food safety and quality products, and we encourage you where mutually beneficial to support Sterns with your food purchases.

Additionally, to further our partnership and support for our Native American partners on the reservations, Sterns is offering to donate to PWNA 1 percent of all new sales from new Native Partners. A new Native Partner can be a business, school, service or other Native American entity who purchases product from Sterns.

When placing your orders, please use offerings code PWNA17. To contact a Sterns representative, please call 602-268-6628 or email NativeAmericanPartners@sternproduce.com.

Sincerely,

Rafael F. Tapia, Jr.
Vice President - Programs
